OBJECTIVE OF THE PROGRAMME

The objective of the One Day Workshop on Regression Analysis in Research is to provide participants with hands-on experience in using statistical software to conduct regression analysis. Through guided exercises and interactive sessions, participants will gain practical skills in data preparation, model building, interpreting results, and diagnosing potential issues in regression models. This objective aims to bridge the gap between theoretical knowledge and practical application, enabling participants to confidently apply regression analysis to their own research projects.

Dr.V.Venkata Ramana Delivered a Topic on Regression Analysis in Research

OUTCOMES OF PROGRAMME

By the end of the seminar, participants will be able to:

- Understand regression concepts, models, and their roles in research.
- Identify and apply appropriate regression models based on data characteristics.
- Evaluate assumptions and address violations for reliable results.
- Prepare and preprocess data effectively for regression analysis.
- Construct, assess, and interpret regression models and coefficients.
- Conduct hypothesis tests and validate models for robust conclusions.
- Communicate findings clearly in academic and practical contexts.
- Apply regression analysis using statistical software.
- Critically assess regression studies for methodological rigor.

By achieving these outcomes, participants will be better equipped to incorporate regression analysis as a valuable tool in their research projects, enhancing the quality and depth of their investigations and contributing to evidence-based decision-making.

Sri Sivani College of Pharmacy was established in the year 2007 under the visionary management of Sri Sivani Educational Society, led by highly motivated and philanthropic individuals with a vision for meticulous planning and commitment to the upliftment of professional education in rural areas of Srikakulam district, Andhra Pradesh. The college is situated in the Eastern Ghats of Andhra Pradesh with a serene, beautiful atmosphere near NH-16, making it easily accessible by bus and local transport from Srikakulam town.

The campus is spread across 2.53 acres of pollution-free, picturesque, lush green surroundings, creating the right ambiance and conducive environment for quality education and research.

OBJECTIVE OF THE PROGRAMME

The primary objective of the One Day Seminar on Experimental Design and Statistical Analysis in Pharmaceutical Research is to provide participants with a deep and comprehensive understanding of the crucial role that experimental design and statistical analysis play in advancing pharmaceutical research. Through an immersive learning experience, the seminar aims to equip participants with a multifaceted skill set and knowledge base that empowers them to conceptualize, design, execute, and analyze pharmaceutical experiments with precision.

Keynote speaker: Mr.B. Muralikrishna

OUTCOMES OF PROGRAMME

By the end of the seminar, participants will be able to:

- Understand Experimental Design: Grasp fundamental concepts of experimental design, including randomization, control groups, and variables manipulation.
- Select Appropriate Designs: Learn to choose suitable experimental designs (e.g., randomized controlled trials, factorial designs) based on research goals.
- Apply Statistical Techniques: Acquire skills in applying statistical methods like ANOVA, t-tests, and regression for analyzing pharmaceutical data.
- Interpret Results: Gain the ability to interpret statistical outputs, including p-values, confidence intervals, and effect sizes.
- Address Bias and Confounding: Understand strategies to control bias, confounding variables, and ensure internal validity.
- Data Collection Planning: Develop methods for collecting pharmaceutical data, ensuring accuracy and reliability.

Through these outcomes, participants will be well-equipped to design rigorous pharmaceutical experiments, analyze data effectively, and contribute to advancements in the field.

OBJECTIVE OF THE PROGRAM

The primary objective of the One Day Seminar on Experimental Design and Statistical Analysis in Pharmaceutical Research is to provide participants with a deep and comprehensive understanding of the crucial role that experimental design and statistical analysis play in advancing pharmaceutical research. Through an immersive learning experience, the seminar aims to equip participants with a multifaceted skill set and knowledge base that empowers them to conceptualize, design, execute, and analyze pharmaceutical experiments with precision.

PROGRAMME NAME	A One Day Seminar on Bayesian Hierarchical Models in Pharmacological Research: Enhancing Understanding and Precision.
RESOURCE PERSON	Dr.K.Rajesh M.Pharm, Ph.D Professor Grapes college of pharmacy, Koyyalagudem PHONE NO: 9000483243 Email id: konathala.rajesh@gmail.com
DATE OF ACTIVITY	21.11.2020

OBJECTIVE OF THE PROGRAMME

The objective of the one-day seminar on "Bayesian Hierarchical Models in Pharmacological Research: Enhancing Understanding and Precision" is to provide participants with a deep understanding of Bayesian hierarchical modeling techniques and their application in advancing pharmacological research. The seminar aims to equip participants with the knowledge and skills required to effectively design, implement, and interpret Bayesian hierarchical models for analyzing complex pharmacological data. Through practical examples and case studies, participants will learn how to harness the power of these models to enhance precision, uncover hidden patterns, and make informed decisions in drug development and clinical practice.

Keynote speaker: Dr.K.Rajesh

OUTCOMES OF PROGRAMME

By the end of the seminar, participants will be able to:

- Master Bayesian Hierarchical Models: Understand and apply Bayesian hierarchical models in pharmacological research.
- Implement Models Practically: Build hierarchical models using suitable software and prior distributions.
- Optimize Precision Dosing: Apply models for personalized treatment strategies based on individual patient characteristics.
- Analyze Longitudinal Data: Interpret trends and variations in longitudinal pharmacological data.
- Conduct Meta-Analysis: Combine data from multiple studies for robust conclusions.
- Apply in Real Scenarios: Engage in hands-on exercises with real-world pharmacological cases.
- Quantify Uncertainty: Incorporate uncertainty analysis into decision-making.
- Extract Meaningful Insights: Interpret model results for actionable insights and effective communication.

These outcomes will empower participants to apply Bayesian hierarchical models effectively, enhancing research precision and contributing to informed decision-making in pharmacology.

OBJECTIVE OF THE PROGRAMME

The objective of the one-day seminar on "Statistical Methods for Bioequivalence Research" is to afford participants with a comprehensive understanding of the statistical techniques used to assess the bioequivalence of generic and reference pharmaceutical products. The seminar aims to equip participants with the knowledge and skills necessary to design, analyze, and interpret bioequivalence studies in compliance with regulatory guidelines. Participants will gain insights into the significance of bioequivalence testing and its implications for drug development and patient safety.

OUTCOMES OF PROGRAMME

By the end of the seminar, participants will be able to:

- Understand Bioequivalence: Grasp the importance and concepts of bioequivalence in pharmaceutical research.
- Design Studies: Develop robust study designs and sample sizes for generic product comparisons.
- Analyze Data: Apply statistical tests to assess bioequivalence and interpret results.
- Manage Variability: Address sources of variability and sensitivity in bioequivalence studies.
- Navigate Guidelines: Comply with regulatory guidelines and ethical standards.
- Interpret Implications: Assess outcomes' impact on drug interchangeability and market approval.
- Analyze Cases: Analyze real-world case studies for practical insights.

These outcomes will empower participants with the skills to conduct bioequivalence studies effectively, ensuring accurate assessments of pharmaceutical product interchangeability and contributing to informed decisions within the industry.

OBJECTIVE OF THE PROGRAM

The objective of the one-day seminar on "Statistical Methods for Bioequivalence Research" is to afford participants with a comprehensive understanding of the statistical techniques used to assess the bioequivalence of generic and reference pharmaceutical products. The seminar aims to equip participants with the knowledge and skills necessary to design, analyze, and interpret bioequivalence studies in compliance with regulatory guidelines. Participants will gain insights into the significance of bioequivalence testing and its implications for drug development and patient safety.

OBJECTIVE OF THE PROGRAMME

The objective of the One Day Seminar on Drafting Patent Applications for Pharmacy Inventions is to equip participants with a comprehensive understanding of patent fundamentals, enabling them to effectively draft patent applications for innovative pharmacy-related inventions by mastering essential skills such as drafting patent claims, writing detailed specifications, conducting prior art searches, and navigating the legal and ethical considerations specific to the pharmaceutical industry.

OUTCOMES OF PROGRAMME

By the end of the seminar, participants will be able to:

- ❖ **Identify Patentable Inventions:** Recognize innovative pharmacy-related concepts that have the potential for patent protection.
- ❖ **Draft Patent Claims:** Develop well-structured and accurately-worded patent claims that define the scope of protection for their inventions.
- ❖ **Write Comprehensive Specifications:** Create detailed and comprehensive patent specifications that sufficiently describe the invention and its technical aspects.
- ❖ **Conduct Prior Art Searches:** Conduct effective prior art searches to assess the novelty and non-obviousness of their inventions in the context of existing knowledge.
- ❖ **Navigate the Application Process:** Understand the patent application process and be able to navigate the specific requirements for filing pharmacy invention patent applications.

Keynote Speaker Mr.G.Manoj Kumar

Overall, the seminar aims to empower participants with the knowledge and practical skills needed to draft effective patent applications for their pharmacy-related inventions, contributing to the growth and advancement of pharmaceutical innovation.
